【授業の概要・目的】									
This course is to improve communication and discussion skills in English with various topics related to science and technology.									
【到達目標】									
Through this course, students will be able to present their own idea clearly and discuss with others efficiently.									
【授業計画と内容】									
<p>Student will select his/her own discussion topic by himself/herself for each term (1st and 2nd term). Subjects can be slightly modified through the class process to make more efficient presentation and discussion. However, students should not change their original subjects without proper reasons.</p> <p># 1st semester</p> <p>Each student will make two-times of <<repeated>> presentations with his/her own topic. In each presentation, a presenter will make discussions with other students on the topic, and contents for the next presentation should be improved based on previous discussions and comments.</p> <p># 2nd semester</p> <p>Each student will select one research journal paper, and make two-times of <<divided>> presentations with the contents of the paper. In each presentation, a presenter will make discussions with other students on the topic, and contents for the next presentation should be improved based on previous discussions and comments.</p>
