[授業の概要・目的]

This lecture-discussion course will introduce students to environmental studies with a focus on human-environmental interactions. We will apply an ecosystem framework to understand the drivers of environmental change, their natural and human impacts, and some possible approaches to ensure long-term sustainability.

[到達目標]

Students will be encouraged to look critically at the environmenal impacts of their own behavior as well as practices on the local, regional, national and international scale. They will consider such concepts as environmental ethics and environmental justice in relation to our obligations to each other and the natural world. Students will be expected to contribute their ideas and express themselves in small group discussions and classroom exercises.

[授業計画と内容]

Each ecosystem will be the focus of study for approximately two weeks:

- Week 1: Course introduction. Environmental ethics
- Week 2: The state of ecosystems today: Defining ecosystem tradeoffs, products and services
- Week 3-4: Agroecosystems: Food supplies and food security, food production and livelihoods
- Week 5: Freshwater and coastal ecosystems: Impacts of pollution, dams
- Week 6: Natural disasters and environmental justice
- Week 7-8: Midterm exam. Forest ecosystems: Impacts of deforestation and forest neglect
- Week 9-10: Grasslands and arid lands: Overuse of natural resources
- Week 11: The global ecosystem: Climate change, population and energy issues
- Week 12: Presentation preparation
- Week 13: Presentation preparation
- Week 14: Group or individual presentations

Note: The schedule may change slightly depending on class requirements

[履修要件]

特になし

[成績評価の方法・観点]

Evaluation will be based on class attendance and active participation (30%), short assignments and classroom exercises (35%), mid-term test (10%) and group or individual presentations (25%).
