## [授業の概要・目的]

We learn about the thermodynamics in the state-change of matter, also in the chemical reactions. Contents of the lecture covers the following fields of change of state, thermodynamic laws, definition of the quantities (enthalpy, entropy, free energy, chemical potential), chemical equilibrium, and reaction kinetics. Aim of this course is the understanding of these concepts.

## 【到達目標】

The aim of this class is to understand the basic principles of thermodynamics.

1. Change of the system and quantity of state
  2. Thermal energy and work
  3. 1st law of thermodynamics: Change of internal energy and enthalpy
  4. Chemical reaction and thermal energy
  5. Interpretation of internal energy in molecular level
  6. Change of state of the ideal gas
  7. 2nd law of thermodynamics: Entropy
