【授業の概要・目的】											
Information technology profoundly impacts all aspects of modern society, including daily life, economics, governance, education, and various industries. It is, therefore, essential to acknowledge the historical development of information science and the evolution of its influence on our society if we aim for a deeper understanding and broader perspective on information-based societies. This lecture will provide foundational knowledge of information technology and the relationships between information technology and society. The course delves into the social impacts of Information and Communications Technology (ICT), information handling, information economics, intellectual property, media literacy, and social media.											
【到達目標】											
The students will be able to articulate the impacts of ICTs on society and the critical issues related to the information economy and information society. They will also be able to develop their perspectives on information technologies, information ethics, and their interactions with society.
