[授業の概要・目的]							
<p>This ILAS seminar is designed to provide freshmen undergraduate students who are interested in cancer, a brief introduction to biology of cancer and the current therapeutics. Students will start to learn from this seminar about the introduction of molecular and cellular biology, and then subsequently the biology principles of cancer. Moreover, recent topics on cancer immunotherapy will also be discussed in this seminar. Finally, students will conduct a presentation on their selected paper and discuss about the current and future therapeutics. Also noted that language that is accessible to students without a medical background will be used in this seminar to help their understanding.</p>							
[到達目標]							
<p>By participating in this ILAS Seminar, students will gain fundamental knowledge of the current understanding of human cancer.</p>

**【履修要件】**

特になし

**【成績評価の方法・観点】**

Attendance and Active participation to the lectures (60%)

Quality of student presentations and discussions (30%)

A report (10%)

**【教科書】**

Handouts and reading materials will be provided when necessary.

**【参考書等】**

( 参考書 )

Robert Weinberg 『the biology of cancer, 3rd edition』 ( GARLAND Science, 2023 ) ISBN:978-0-393-88766-2

**【授業外学修（予習・復習）等】**

I recommend students to confirm the handouts for each lecture and the relevant reference textbook to learn about the lecture content in advance of the class. Handouts for each lecture will be uploaded on Panda a few days before each class.

**【その他（オフィスアワー等）】**

Consultation via email or online meetings such as Zoom is possible. For those students who prefer to discuss directly with the instructor, please arrange appointments by email in advance.
