[授業の概要・目的]

The purpose of this class is to develop abilities to communicate effectively in academic/clinical context in English. The class is tailored for medical students, and particularly focuses on group work & discussion, which are basic skills for career as medical professionals. Student will be strongly expected to work with other people & contribute to discussions. There are opportunities for students' project, interactions with foreign teaching staff. All classes are delivered in English.

< Teaching Policy >

- (1)Students are strongly encouraged to use English only in the class. Most of the teaching staffs in this course come from different countries and bring in a wide variety of experiences to this course.
- (2)We believe that high English proficiency does not necessarily mean excellence in English reading and writing. We expect students to develop communication skills and learn how to think, express, and exchange ideas with others in English.
- (3) For the (2) policy, we expect students to actively participate in the class and work with your peers.
- (4)There are many group-based, interactive actives in the class. Therefore, we consider attendance is very important.
