Days and periods	Thu.4		Target year	All students		Eligible students	For all majors
[Overview and purpose of the course]							
This course is an introductory undergraduate course that teaches the fundamentals of macroeconomics and application of economics concepts. It provides a solid foundation for macroeconomic analysis and thinking that can last throughout their education and subsequent professional careers.							
[Course objectives]							
After completing this course, students should have developed a range of skills enabling them to understand economic concepts and use those concepts to analyze specific questions. By the end of this course, students should be able to understand economic growth, recession/booms, un-/employment, de-/inflation, and the financial system.							
[Course schedule and contents]							
<p>Course Description:</p> <p>This course begins with an introduction to supply and demand and the basic forces that determine an equilibrium in a market economy. Next, it introduces a framework for learning about macroeconomics indicator, such as the Gross Domestic Product (GDP) and the Consumer Price Index (CPI). We then turn our attention to specific economic problems such as recessions, unemployment, inflation, international trade etc. The final section of the course provides an opportunity of independent learning. It helps students to deeply understand basic tools of macroeconomics and the way to apply them to real world economic policy.</p> <p>Content Outline:</p> <ol style="list-style-type: none"> 1 What is Economics 2 Economic Methods and Questions 3 Optimization, Choice in the World of Scarcity 4 Equilibrium, Demand and Supply 5 Pricing Elasticity 6 The Macroeconomic Perspective 7 Inflation and The cost of Living 8 Economic Growth 9 Employment and Unemployment 10 Money and Banking 11 Monetary Policy and Bank Regulation 12 The International Trade and Capital Flows 13 Students ' Conference on Selected Macroeconomic Topics (I)
