[Overview and purpose of the course]

This class will introduce students to new and exciting topics in modern physics. Recent discoveries and Nobel prize-winning research will be discussed in straight-forward terms so every one can understand and enjoy modern science. Lectures and discussions will be held in English and will cover a wide variety of topics in recent research. Even students with no previous physics experience are encouraged to join this class and learn about how we understand the world today.

[Course objectives]

Students in this course will learn about the fundamental physics behind recent topics in modern research as well as how they are applied in the real world. In addition, students will be introduced to and practice speaking in scientific English.

[Course schedule and contents)]

Each week a different topic in modern physics and cosmosolgy will be presented. The following week will provide a review of material with discussion. Topics will include some of the following:

- -) Discovery of the Higgs boson
- -) Observation of gravitational waves
- -) Neutrinos and their oscillations
- -) Radiation in the modern world
- -) The history and accelerating expansion of the universe
- -) Quarks and CP symmetry
- -) Lasers for trapping atoms
- -) From the birth of stars to supernovae

In addition to the above, students may request lectures on a few topics of their choice.

LAS Seminar-E2 :Topics in Frontier Physics (現代物理学の最先端) (2)
None
Evaluation methods and policy]
This is a seminar course and the grade will be based on in-class participation only. Coming to each class with
uestions and an open mind is all that is needed.
[Textbooks]
Not used
[References, etc.]
(References, etc.) ntroduced during class
[Study outside of class (preparation and review)]
nstructions on material to review ahead of lectures and supplementary reading will be presented in class.
[Other information (office hours, etc.)]
Students curious about recent discoveries in physics are encouraged to attend this course.
[Essential courses]
