( Students of Graduate School of Agriculture cannot take this course as liberal arts and general education course. Please register the course with your department. )							
<b>[Overview and purpose of the course]</b>							
This course provides comprehensive understanding on the relatively new concept of "Human Security" that emerged in the 1990s and has been developing since. In the former half of the course, we will aquire general knowledge on the concept of "human security"--its background and development process; its international framework; and state and regional policies concerning "human security," including those of Japan and ASEAN. In the latter half of the course, we will focus on three "human security"related issues--food and water resources; environment and energy; and public health.							
<b>[Course objectives]</b>							
To be able to explain about the conception of "human security development" and specific issues related to human security.							
<b>[Course schedule and contents)]</b>							
<p>One or two lectures will be given on each of the following topics:</p> <p>Aggravation of global problems and the emergence of the concept of "human security"</p> <p>(Limits of conventional development; aggravation of problems beyond national borders; necessity for a new comprehensive concept).</p> <p>First approach to human security: Regional conflicts and humanitarian intervention</p> <p>Second approach to human security: Sustainable development</p> <p>International institutional framework for human security</p> <p>Japanese and ASEAN policies regarding human security</p> <p>Issue 1: Food and water resources</p> <p>Issue 2: Energy and environment</p> <p>Issue 3: Public Health</p> <p>Conclusion</p>
