# [Overview and purpose of the course]

This subject aims at studying the ecological and social dynamics of Southeast Asia and issues embedded in them including human health, human activity and natural environment and natural resources management. The knowledge and ideas provided in this subject would be the foundation to think over about the human security development of Southeast Asia.

# [Course objectives]

To acquire basic knowledge on geography, society, and culture of Southeast Asia, and contemporary issues in the region.

### [Course schedule and contents)]

One or two lectures will be given on each of the following topics:

Introduction to Southeast Asian Studies

The natural environment and development path of Southeast Asia

The society and culture of Southeast Asia

Economic development, poverty, and economic disparities

Natural resource management and environmental degradation

Conflict, governance, and peace-keeping

Contemporary human security issues in Southeast Asia

## [Course requirements]

None

### [Evaluation methods and policy]
