[Overview and purpose of the course]							
<p>This course aims at developing problem-solving, critical thinking and communication abilities for future health care professionals. Issues such as clinical communication, ethics, professionalism, teamwork in healthcare will be covered. Each class consists of a short lecture and discussion or group work activity often using Problem based Learning(PBL). Students are expected to learn how to think and reach their own answers, rather than given by teachers. All lectures, discussions, group works will be delivered in English only.</p> <p>This course is primarily for the 2nd year students in the Faculty of Medicine, but we welcome a few students from healthcare-related departments, with a short English proficiency test on the first day of the course.</p>							
[Course objectives]							
<p>By the end of the course, students will be able to</p> <ol style="list-style-type: none"> 1) understand contemporary ethical issues that future healthcare professionals would encounter 2) collect and interpret relevant evidence with other people, and express their opinions showing traces of reasoning 3) understand how to construct good relationship between patient and doctor and demonstrate them. 4) understand how to work with others who have different thoughts, and perform team work building skills

[Course requirements]

None

[Evaluation methods and policy]

Students are responsible for satisfying all academic objectives as defined by the instructor. Absences count from the first class meeting.

Assessment I 35%, Assessment II 35%, Attendance & Performance 30%. Criteria are different in each Assessment, and we announce them in the class and make it clear and open to students.

Since the course employs a small group discussion style, participation in the classroom is essential for this course. Therefore, students have to achieve a minimum of 60% in Attendance & Performance for credit purposes.

However, students are exempt from the required condition about attendance when they have acceptable reasons for absence such as illness, serious family emergencies, special curricular requirements, severe weather conditions, and participation in official university activities. In such cases, the students are obliged to submit a reasonable document to the instructors and use a reasonable amount of time to make up the material or activities covered in their absence.
