[授業の概要・目的]									
This course provides a basic introduction to the principles of linguistic science. It will cover the following core areas of study in the field of linguistics: phonetics, phonology, morphology, and language change.									
[到達目標]									
After taking this course, students will have a basic understanding of how to critically consider and analyze actual linguistic data from a variety of languages.									
[授業計画と内容]									
The course is divided into the following five sections, each with a different theme. Exercises and readings will be regularly assigned to help you explore various descriptive and theoretical issues.									
1. Introduction (about 2 weeks) What is linguistics?; the nature of our knowledge of language; main areas of study in linguistics; the prescriptive (normative) vs. descriptive approach									
2. Phonetics (about 3 weeks) How are sounds produced and described?; articulatory phonetics: describing consonants and vowels; the International Phonetic Alphabet (IPA chart); phonetic features and natural classes									
3. Phonology (about 3 weeks) How do sounds in a language pattern?; the phonemic principle: phonemes and allophones; formulating phonological rules; seeing patterns in the data: minimal pairs, complementary distribution									
4. Morphology (about 3 weeks) How are words built?; units of meaning: morphemes and allomorphs; derivational vs. inflectional morphology; word formation: prefixes, suffixes, infixes, reduplication, compounding; inflectional categories: number, person, gender, case, tense, aspect									
5. Language Change (about 3 weeks) How and why do languages change over time?; language families; sound change and analogy; grammaticalization; reconstructing dead languages: protolanguages, the comparative method									
Feedback (1 week)									
Total: 14 classes, 1 Feedback session
