[授業の概要・目的]

Based on the knowledge you gained from the Fundamental Physics B course, this course will expand your understanding of electromagnetic theory. After a review of the basics of classical electromagnetism up-to Maxwell's equations, we will explore the subjects of electromagnetic wave propagation, interference and diffraction, as well as the derivation of electric and magnetic properties in substances and their boundaries.

[到達目標]

- Follow the historical progression in our understanding of electromagnetic laws.
- Understand the meaning of physical properties in electromagnetism.
- Apply the laws electromagnetism to solve practical problems.

[授業計画と内容]

1. Mathematics review: Coordinate systems, fields, gradient, divergence, curl [2 week].
2. Electrics review: Coulomb's force, dipoles, electric potential, Gauss's law [2 weeks].
3. Magnetics review: Ampere's law, Faraday's law [2 weeks].
4. AC circuits: Resistive, inductive, and capacitive load [1 week].
5. Maxwell's equations: Electromagnetic radiation, interference, diffraction [4 weeks].
6. Electromagnetic properties in substances and at boundaries [2 weeks].
7. Finite element analysis for electromagnetism and its applications [1 weeks].

Final examination [1 week].
Feedback session [1 week].

[履修要件]

Fundamental Physics B course.

[成績評価の方法・観点]

Evaluation will be based on:
- Class Participation (20%): Student participation will be asked in solving problems and discussing theories and their application.
- Homework (30%): Typical problems will be assigned, which you can solve by applying the laws and methods learnt during lectures.
- Final examination (50%): You will be tested with a series of problems that combine previously studied cases and original cases.

[教科書]

Study guides will be provided every week, to help you expand your knowledge. The study guides closely match the week's topic, providing in-depth explanations, problem solving strategies, and summaries of key points.

[授業外学修（予習・復習）等]

For smooth progress of the class, I recommend that students refer to the reference book or textbooks on ' Fundamental Physics' to understand the terminologies related to class in advance. Students can review the contents of the class using the lecture notes, and take-home assignments will be given to help them understand.
