【授業の概要・目的】											
This course will introduce students to four defining anthropologically inspired frameworks that have been critical in exploring the many fraught relationships between Nature and Culture. These frameworks or ideological perspectives have in actual fact driven the field of ecological and environmental anthropology by sparking innumerable debates, discussions and sharp disagreements. The true weight of this scholarship, however, as this course will empathize and outline, lies not only in the empirically informed insights that have been generated over the years but the riveting theories that have helped us reflect on the Nature-Culture divide and overlap.											
【到達目標】											
The Nature-Culture divide has been foundational in defining a range of philosophical and political attitudes. This course is intended to help navigate the complex theory laden understanding of how humans have interacted with and shaped their environments.											
【授業計画と内容】											
Each class will comprise a 90 minute session; involving a lecture of 60 minutes and followed by a 30 minute interactive discussion in which student participation will be elicited through either group or individual presentations.											
Four themes will be covered:											
a) Cultural Ecology b) Socio-Biology c) Conservation Ecology d) Political Ecology											
Total 14 classes and 1 feedback session.											
【履修要件】											
特になし											
【成績評価の方法・観点】											
There will be a regular cycle of written submissions and feedback through class discussions and teacher evaluations. The idea is to develop a credible capacity for reading and writing amongst those who take up the course. Evaluations will be based on class presentations, writing assignments and tutorials.
