[授業の概要・目的]

"Theory and Practice in Scientific Writing and Discussion" will provide students with the basics of scientific English.
Expressions and vocabulary used in scientific texts are different from everyday English. When giving a presentation or a seminar, or writing a report or research manuscript, it is critical to use a well organised and precise language so that the ideas and discoveries are well communicated.
This course is mainly targeted to students who wish to pursue a scientific career, especially in research.
Although learning new vocabulary and grammar is a substantial part of this course, the emphasis will be put on practice.

[到達目標]

To acquire basic knowledge on the structure and vocabulary of scientific English (biology, physics, chemistry).
To be able to build sentences using the vocabulary and grammar they have learned.
To learn English names of common scientific tools.
To be able to accurately describe dimensions and relative positions of objects, scientific equations, chemical reactions and other scientific concepts.
To be able to communicate scientific content in English in a relaxed manner and without hesitation.
