キーワード	Stem Cell / iPS Cell / Cancer Stem Cell / Cell Therapy / Disease Modelling									
[授業の概要・目的]										
Fundaments of Embryology (from the oocyte until gastrulation/neurulation) and Stem Cell Biology (ES, iPS, CSC) will be introduced. Students will learn from recent research articles (including the original Takahashi & Yamanaka paper) as well as from recent textbooks on Developmental Biology and Stem Cell Research. After learning about the several subjects, the students will present recent research in class and active discussion will be encouraged.										
[到達目標]										
The classes will be interactive. Recent exciting research discoveries about iPS cells and cell replacement therapy will be introduced and discussed. The students will learn about stem cells, cell commitment and differentiation, iPS cells, cancer stem cells, disease modeling and personalized cellular therapy.

One class will be in the laboratory to observe first-hand the power of genes on cell identity, e.g. stemness or differentiation

[成績評価の方法・観点]

Evaluation will be based on active participation and small assignments (~20 %), group presentations (~30%) and quizzes/tests (~50 %). Those who are absent more than four times will not be credited.

[授業外学修(予習・復習)等]

Some time will be necessary weekly to prepare for the class. Handouts will be available in advance to help with the preparation. During the assignment week extra time will be necessary in order to prepare for the presentation in class.

[その他(オフィスアワー等)]

Questions and discussions during class are highly encouraged.

Questions and discussions will also be addressed, happily, any other time, even outside the official office hours.
