[Overview and purpose of the course]						
The overall aim of the seminar is to develop understanding of the key current issues in palliative and end-of-life care globally. Issues related to aging population, chronic illness rise will also be addressed. We will use a combination of short lectures, interactive group discussion and problem-based activities throughout the course to address aspects of clinical decision-making in palliative care, communication challenges in facing terminal prognosis, ethical issues, holistic needs assessment and management of family dynamics. We will also have an international speaker from UK to give a lecture and present their work with a current challenge in their clinical practice.						
[Course objectives]						
To understand the concepts of palliative and end of life care To understand the different models of palliative care within different countries. To develop awareness of the different disease groups relevant to palliative care To develop awareness of the current debates within palliative care globally.
