<b>[授業の概要・目的]</b>									
The aim of this lecture is to introduce the basic concepts of Einstein's theory of relativity. First, the theory of special relativity will be explained in detail. After this, the basics of general relativity will be introduced in an elementary way. The lecture is supposed to be interactive.									
<b>[到達目標]</b>									
The students will learn the formalism needed to study special/general relativity. They will learn a geometrical intuition in the theory of relativity.									
<b>[授業計画と内容]</b>									
I. Introduction and Historical backgrounds II. Einstein's Principle of Relativity III. Special Relativity and Lorentz Transformation IV. Relativistic Mechanics V. Interesting Examples of Lorentz Transformation VI. Maxwell Equation and Lorentz Invariance VII. Relativistic Momentum and Energy II: Four Vectors and Transformation Properties VIII. General Relativity									
In total, at most 14 classes will be offered (one for each week of the semester) plus one feedback meeting with the students.									
<b>[履修要件]</b>									
Fundamental Physics A (recommended) , Fundamental Physics B (recommended)									
<b>[成績評価の方法・観点]</b>									
Evaluation method: 25%: mid term exam; 75%: final exam. No homework is given during the whole duration of the course.

### [授業外学修（予習・復習）等]

The students will be provided with the lecture notes of the course [as a pdf file in LMS and on kulasis]. They are supposed to study them, not only to review the work done in previous lectures but also to prepare for the upcoming ones.

### [その他（オフィスアワー等）]

2 hours of office hours per week to be decided with students [usually taking place on Fridays at noon]. E-mail will be provided, so that the students can contact the teacher at any time.
