[授業の概要・目的]

In order to design practical and effective development plans and policies, it is essential to deeply understand local communities. In order to understand the voices and thoughts of communities, qualitative research methods will enable us to gain a deeper understanding of reality and everyday life. This is from the perspective of common people, from their own words and viewpoints. It brings voices to the voiceless and hears the unheard. This is a bottom-up approach.

Qualitative research is not only a science but also an art. During this course, we will learn the art and science of qualitative research methods. We will learn the basics of conducting qualitative research by discussing with each other, observing our university campus and fellow students, and reading articles. In this course, students will gain a basic understanding of qualitative research methods by completing practical exercises, conducting field surveys, and analyzing field data.

[到達目標]

The main objectives of this seminar course are as follows:

1. This course will teach you how to conduct interviews, hold group discussions, and analyze photographs and documents.

2. The purpose of this course is to learn how to select research fields, decide on samples, and collect data from interviews, observations, photographs, and texts.

3. Learn how to analyze and present those data scientifically and aesthetically by coding, decoding, phasing, and paraphrasing.
