[授業の概要・目的]

This course is an introductory undergraduate course that teaches the fundamentals of macroeconomics and application of economics concepts. It provides a solid foundation for macroeconomic analysis and thinking that can last throughout their education and subsequent professional careers.

[到達目標]

After completing this course, students should have developed a range of skills enabling them to understand economic concepts and use those concepts to analyze specific questions.
By the end of this course, students should be able to understand economic growth, recession/booms, un-/employment, de-/inflation, and the financial system.

[授業計画と内容]

Course Description:
This course begins with an introduction to the key principles of economics and the basic forces that determine an equilibrium in a market economy. Next, it introduces a framework to lear about gains from trade and comparative advantage. We then turn our attention to specific macroeconomic problems such as economic growth, saving and investment, unemployment, inflation, the monetary system, and conclude with a concept of macroeonomics in an open economy. The final section of the course provides an opportunity of independent learning. It helps students to deeply understand basic tools of macroeconomics and the way to apply them to real world economic policy.

Content Outline:
1. What is Economics
2. Economic Methods and Questions
3. Choice in the World of Scarcity
4. Economic Growth
5. Investment and Saving
6. Unemployment
7. Inflation
