[授業の概要・目的]

This course provides an opportunity for students to revisit material covered in the second semester of basic organic chemistry using English. The two purposes of this course are to ensure that students have a good foundation in basic organic chemistry and to proficiently apply these concepts in English. This course is beneficial for students who have already taken the second semester of basic organic chemistry or who have an interest in learning organic chemistry in English.

[到達目標]

This course aims to help students have a good understanding of basic organic chemistry, particularly in regards to basic organic reactions of alkenes and alkynes, and nucleophilic substitution or elimination reactions.

[授業計画と内容]

The course is planned to cover the following topics:

*Introduction to the course and a brief review of chirality and stereochemistry
*Reactions of alkenes and alkynes
*Haloalkanes, halogenation and radical reactions
*Nucleophilic substitution reactions and beta-elimination reactions

Each topic will be covered in approximately 2 to 6 weeks based upon the needs of the class.

Note: the course contents can be subject to change based on the needs of the class

A feedback session will take place one week after the final exam.

Total:14 classes and 1 feedback class

[成績評価の方法・観点]

Evaluation will be based on class attendance and active participation (20%), homework (10%), quizzes (30%), and a final exam (40%).

[授業外学修（予習・復習）等]

Students should complete assigned homework and turn it in by the due date (usually one week later). Assignments are given and submitted using LMS unless otherwise notified.

[その他（オフィスアワー等）]

Office hours are welcome and available by appointment.
