[Overview and purpose of the course]							
*this is the course provided by the Interdisciplinary Unit for Global Health This course is provided in English by the Global Health Interdisciplinary Unit. The course is conducted entirely through ZOOM and accessed via LMS. It includes a wide variety of classes to provide students with insight into global health challenges. Students will be introduced to the socio-cultural, economic, political, and environmental factors that globally affect the health of populations. A series of guest speakers will be drawn from diverse fields to share their expertise. We welcome students from all faculties and graduate schools.							
[Course objectives]							
To gain a wide range of perspectives and critical knowledge about current global health issues. Students will be able to understand why tackling global health issues is such an important endeavor to reduce poverty, build stronger economies, and promote peace.							
[Course schedule and contents)]							
後期水曜日3限目 Wednesday, 13:15 to 14:45 (3rd period)							
This course is simultaneous bidirectional course every time. Detailed schedule will be announced on LMS. The specific dates for each topic will be provided on the first day of class. In principle, we will cover the following topics:							
1. Introduction: Why study global health? 2. Understanding the social determinants of health 3. Achieving the health-related Sustainable Development Goals 4. Sexual Reproductive Health 5. Delirium & Working Globally 6. Group Discussion 7. Environment & Health 8. Global Health & Aging 9. Role of Innovation & Technology in Changing People ' s lives
