（医学研究科の学生は，全学共通科目として履修登録できません。所属部局で履修登録してください。）

[授業の概要・目的]

*this is the course provided by the Interdisciplinary Unit for Global Health

This course is provided in English by the Global Health Interdisciplinary Unit. The course is conducted entirely through ZOOM and accessed via LMS. It includes a wide variety of classes to provide students with insight into global health challenges. Students will be introduced to the socio-cultural, economic, political, and environmental factors that globally affect the health of populations. A series of guest speakers will be drawn from diverse fields to share their expertise. We welcome students from all faculties and graduate schools.

[到達目標]

To gain a wide range of perspectives and critical knowledge about current global health issues. Students will be able to understand why tackling global health issues is such an important endeavor to reduce poverty, build tronger economies, and promote peace.

[授業計画と内容]

後期水曜日3限目
Wednesday, 13:15 to 14:45 (3rd period)

This course is simultaneous bidirectional course every time.
Detailed schedule will be announced on LMS.
