[授業の概要・目的]

This course will introduce students to the central topics, concepts and methods of socio-cultural anthropology, which can be broadly defined as the study of human cultures and societies. It will survey the key areas of inquiry in contemporary socio-cultural anthropology and offer insights into how the seemingly most commonsensical aspects of any person’s life can be informed by the cultural and social contexts of which they consider themselves a part.

The course will draw on ethnographic examples and case studies from a variety of cultures, but contemporary Japan will play a major role, in order to provide students with an interpretational framework for a better understanding of the context where we are living.

[到達目標]

The course aims to introduce the key debates and understandings within socio-cultural anthropology. It will allow students to:
- understand key concepts and terminology of socio-cultural anthropology
- develop a cultural perspective, to realize that anthropology involves a way of seeing, a frame of reference for interpreting people's behaviour in all societies
- develop an acceptance and appreciation of people informed by different cultures, and maintain a non-judgmental attitude
- understand social relationships, for a comprehension not only of man, society and culture in general, but also of ourselves, our experiences, our own societies and cultures, as well as of the particular context where we are living at present, i.e. contemporary Japan.

[授業外学修（予習・復習）等]

Students are required to complete the assigned readings and to come to class prepared to discuss them.

During the Course Introduction, we will discuss the possibility of conducting small ethnographic projects outside of class time.

[その他（オフィスアワー等）]

The list of topics above is indicative and rather optimistic. Depending on how long class discussions go on, the number of topics might be reduced. Needless to say, the final test will cover only the topics introduced during classes.
