[授業の概要・目的]

Students joining this course will encounter a range of qualitative research methods and learn how someone limited to one social science background (economics, sociology or other humanities) can potentially integrate these methods into their research and/or analysis.

The first part of this intensive course is designed primarily for the early graduate students and those who have yet to conduct their primary research, as it provides guidance about the design, proposal and execution of qualitative research methods. The second part of the course is designed for students at all graduate levels, but can be especially timely for 2nd year students and later who are beginning their data analysis. It presents a range of methods and options for the analysis of qualitative data, regardless of which form it is in (interviews, archives, multimedia, etc.).

[到達目標]

To survey a range of qualitative research and analytical methods in order for students to choose the tools that are best suited for the research they are preparing or analyzing, and to understand how to implement them.
